---

### PROFILE

I am a fresh graduate from King Abdulaziz University, with high GPA, and many small projects in the area of information technology and specially in software engineering. I am fairly knowledgeable about the new technology trends and the basic project management concepts and best practices. I am interested in cloud computing, software applications, web applications, and any related fields.

I am very capable of self-learning and problem solving, time managing, and prioritizing multiple tasks. I am organized and have the appropriate communication skills.

---
